Shore Power Cords

If you are old enough, you will remember the time when a Shore Power Cord was just an extension cord. It mostly just fed a small 20A converter/charger for the 12V needs, although a 15A was the standard hook-up in most campgrounds for a long time.

20A Extension Cord

With the larger campers and motorhomes came the 30A line. You always needed to carry a conversion adaptor because 30A service was not always supplied in many campgrounds.

SUPERFLEX50

EASY TO ROLL UP IN COLD & WARM WEATHER!

SUPERFLEX50 - Rated for -58 degrees F to +220 degrees F. Outer cable jacket is Seoprene Thermoplastic Elastomer (TPE).

50A - RV SIDE

Female
50A, 125/250 volt
3-pole, 4-wire

50A RV PARK SIDE

Male
50A, 125/250 volt
3-pole, 4-wire

- LED Power Indicator
- Stows easily & remains flexible
- Standard Park Power Connector
- Coils tightly even in freezing weather!
