

The "Stanley's" Bus A 1952 Flexible Visicoach

By Steven Arnold

Since a very young age, I have always been interested in how things are designed and assembled. I was the kid that always took things apart when they were broken to see what made them tick.

Soon I was fixing things and when done there usually were only a few parts left over. Sometime later repairs were made without those "extra" parts left over.

In my teenage years, I loved anything with a motor in it and as I came to driving age I was always buying and improving muscle cars and 4x4 trucks. To this day, collector cars continue to be an interest and hobby of mine.

Front view of the Stanley's Bus.

This passion was one of the things that attracted me to motor homing when Laurie and I started discussing a possible purchase. I enjoy looking for items to fix and improve. I just love tinkering with our coach. As RV'ers, one of the first clubs that we joined was the Busin' Buddies, a New England chapter of FMCA.

It was interesting to meet and talk to some of

EHP

Engine Heat Protection

Reduce that unwanted heat with
EHP Wet Blanket exhaust insulation

EHP Wet Blanket is a 1/4-inch thick ceramic-based material used for insulating underhood components from heat. Usable in temperatures up to 3200 degrees Fahrenheit, the blanket is wrapped around the heat source, such as exhaust pipe and reduces its radiating temperature by half. It contains no asbestos. Easy to install - complete instructions.
